EDUCATION

University of North Carolina at Charlotte

Charlotte, NC

Bachelor of Science in Computer Science, Concentration in Software Engineering

August 2023 – August 2025

- Relevant Coursework: Software Engineering, Web-Based Application Design and Development, Mobile Application Development, Data Structures and Algorithms, Database Design and Implementation

Mitchell Community College

Statesville, NC

Associate in Science

August 2020 – July 2023

- Dean's List
- Relevant Coursework: Advanced Java Programming, C++ Programming

EXPERIENCE

1maginary.online

Remote

Android Developer (Freelance)

November 2024 – December 2024

- Developed a mobile application for live monthly music events, enabling real-time user interaction and engagement
- Implemented Firebase Firestore integration for live chat functionality, including pinned messages, XP system, and session playback
- Built flexible authentication system supporting both registered users (Firebase Auth) and guest sessions (SharedPreferences)
- Designed responsive UI/UX and integrated backend services to deliver a fully functional app prototype for client
- Gained expertise in real-time data handling, Android Services for background audio, and scalable app architecture

PROJECTS

VoyagerAI | AI-Powered Car Rental Platform, Full Stack Web Application, OpenAI API, Node.js, MongoDB

- Developed an AI-powered car rental platform enabling users to find optimal vehicles based on preferences, location, and live inventory
- Integrated OpenAI-powered chatbot and contact form to provide 24/7 customer support and streamline vehicle recommendations
- Implemented secure user authentication and booking management system with account history tracking
- Engineered a scalable backend using Node.js and Express.js with MongoDB to support nationwide operations and high user traffic

CruzLandscaping | Business Website For Local Company, Frontend Development

- Built a business website to help users understand the company's services, values, and project offerings
- Implemented a contact form integrated with webhooks for real-time notifications and client inquiries
- Developed a responsive and user-friendly interface to ensure smooth navigation across desktop and mobile devices
